

Homework 5

PCEP

Tuesday @ 5:15pm

Puzzles

1. Write a program that receives a string from the user, then print out the letter that repeats the most times, if there's none then print out to the user that there are no repeated letters.
2. Write a program where it prompts the user what operation wants to be used (+ , - , * , /) then asks for two numbers to be used with the operator and print the result.
3. Write a program where you enter the amount of money that you earned, then print out the result if it was repeated 5 times.
4. Write a program where you use a boolean to identify if the user input is less than 1 if it is then it prints out an error, and if not then print the boolean and the number given.
